

## Museums and heritage sites are exciting.

We truly believe in this idea. And we totally understand if you think that they are boring. We work to change it.

We are a group of historians, art historians and educators mainly with museum background who decided to take on a unique path and work with museums (instead of working in museums).

**We create museum experience,**

and educate in an entertaining and fun way using mainly the tools of game design and drama pedagogy. We do trainings on museum game design and living history, and we design projects together with museums.

We are the organizers of “Múzeumi Játékmustra” (Museum Game Fair) since 2019 – a program for game designers, educators and museum experts to connect, create and learn from each other.

There is an active facebook-group for this community as well with 500+ participants.

### We have created together with a museum:

- Interactions in exhibitions
- Museum educational programs
- Audioguide
- Museum games
- Workshops for professionals

### Our partners and friends:

Most of our partners, projects and initiatives are related to the museum sector, including the Hungarian National Museum, Hungarian Museum of Trade and Tourism, and also independent initiatives such as Parallel Worlds, Pro Progressione.

Our audience is mainly young professionals from the Y generation, who want to innovate and open towards new methods and techniques.
